

25MWT CHART FOR 25MPU

This chart displays calculated depths for which you should be able to pump your well using the number of weights shown. This should simply be a guide for determining the quantity of weights to purchase and install on the pumpjack to get started. Variations in downhole conditions do not allow these calculations to be the only determining factor. Proper balancing in the field is still critical to avoid excess wear or possibly even damage to your equipment.

#25MWT	Maximum Depth - Ft.
1	223
2	466
3	699
4	932
5	1165
6	1398
7	1631
8	1864
9	2097
10	2330
11	2563
12	2796
